

The Goelst KidsRail

Colorful care with Goelst

A hospital does not look like home, no one likes to be there. A color makes it a bit more cheerful.

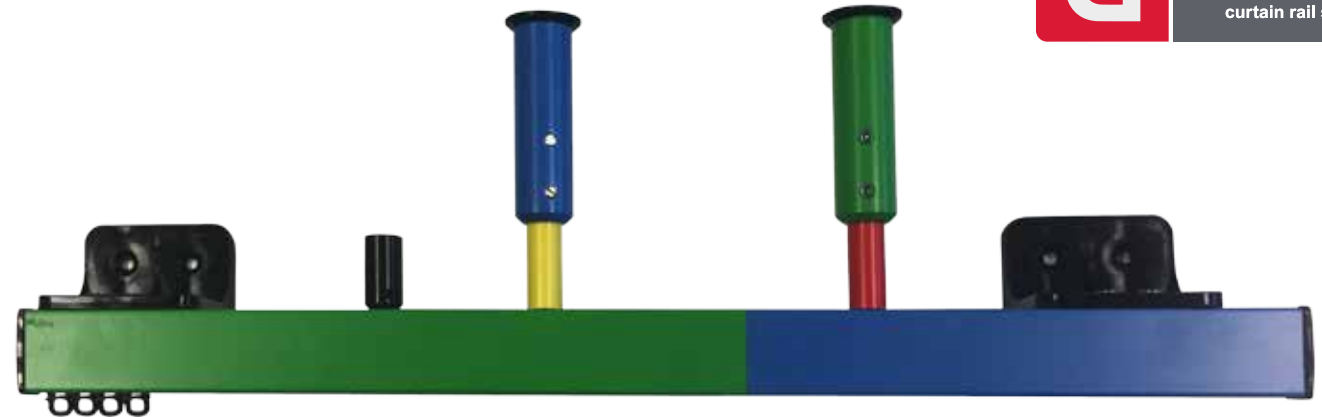

That's why our privacy rails 4100 and 5100 are available in all colors of the rainbow. So that children's departments are no longer dependent on colors for adults. And everything looks a bit happier. A bit like home.

The different components of each rail system can be made in one or in different colors. The plastic parts such as end caps and gliders are delivered in black, but can be ordered in custom colors under certain conditions.

We have four standard colors:

- lobster red
- chick yellow
- peacock blue
- frog green

We can also deliver colors on request.

Cliniclowns

We donate 5% of our KidsRail income to Cliniclowns. Cliniclowns are bringing smiles and happy feelings to healthcare institutions in the Netherlands for many years. These are priceless moments for sick children and their parents.

- **Unlimited color selection**
- **Components in different colors possible**
- **Full finish (also the plastic parts can be colored)**
- **5% of the proceeds are donated to Cliniclowns**
